PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/781,645	GOTO, TAKAHIRO	
	Examiner	Art Unit	
	Cynthia H. Kelly	1752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Jan 30, 2007 and interview of 7/19.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 4-6 and 10-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 4-6 and 10-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1752

This action is in response to the interview of July 23, 2007 with Ms. Jennifer Hayes.

The finality of the last office action, mailed April 17, 2007, is withdrawn.

DETAILED ACTION

Response to Amendment

1. The amendment filed January 30, 2007 has been entered and fully considered.
2. Claims 4-6, 10-19 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-6, 10-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over NAKAMURA et al. (EP 1 223 196 A2) in view of OSHIMA (EP 1 176 467 A1).

a. NAKAMURA et al. teach a negative image-recording material, used to make a printing plate, wherein the negative image-recording material comprises a cyanine IR absorbent, a radical generator, a radically polymerizable compound and polymer binder (abstract; [0088]-[0096], claims 1 and 29). The IR absorbents of formula (3), (3-1), IR-1, IR-2, and IR-5 meet the present limitations for the presently claimed infrared absorbing compound. A sulfonium salt is among the preferred radical generators and is represented by general formula (V) (claims 15-20; [0066]-[0069]). In general formula (V), R31, R32 and R33 are optionally substituted hydrocarbon groups having at most 20 carbon atoms. Examples of substituents include halogen atoms.

Art Unit: 1752

Nakamura et al. do not exemplify a sulfonium salt having three aryl groups two of which are substituted specifically with chlorine atoms however it would have been obvious to one of ordinary skill in the art to incorporate any halogen substituent including chlorine atoms. Other preferred radical generators include iodonium salts and diazonium salts, which can be used alone or in combination of two or more (claims 15-20; [0066]-[0072]). Linear organic polymers, soluble or swellable in water or weakly alkaline water, are preferred as the binder polymer ([0088]). NAKAMURA et al. does not teach the binder polymer required in the present application. However, based on the teachings of OSHIMA it would have been obvious to one of ordinary skill in the art to use the binder polymer having a repeating unit of formula (I) wherein R^2 represents a hydrocarbon group which has an alicyclic structure and has 3 to 30 carbon atoms in order to obtain sufficient print durability and high productivity (abstract; [0013]-[0030] such as

which meet the

present limitations for the same. According to NAKAMURA et al., especially preferred

Art Unit: 1752

supports of the image forming material are aluminum supports having a center line average roughness between 0.1 and 1.2 μm ([0116]-[0127]).

In light of the amendment, the rejection over NAKAMURA et al. (EP 1223196 A2) in view of OSHIMA (JP 2002-040652) is withdrawn. However, upon further consideration, a new ground of rejection is made in view of NAKAMURA et al. (EP 1223196 A2) in view of OSHIMA (EP 1176467 A1).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia H. Kelly, can be reached on 5715 272-1526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
